How to Attempt?

All Digits Count

Write a function to find the count of ALL digits in a given number N. The number will be passed to the function as an input parameter of type int.

Assumption: The input number will be a positive integer number ≥ 1 and ≤ 25000 .

For e.g.

If the given number is 292, the function should return 3 because there are 3 digits in this number

If the given number is 1015, the function should return 4 because there are 4 digits in this number

JAVA7

Compiler: Java - 1.7

```
1 import java.io.*;
2 import java.util.*;
3
4 // Read only region start
5 class UserMainCode
6 {
7
8     public int allDigitsCount(int input1){
9         // Read only region end
10
11         {
12             String str=Integer.toString(input1);
13             return str.length();
14         }
15 }
```
